Blood cells

Summary:

Rough copy:

Blood cells

Our blood consists of three types of blood cells: red blood cells, white blood cells and Platelets. The red blood cells are small, thin and disc shaped. They are composed of haemoglobin. Haemoglobin molecule picks up oxygen molecules and supplies them to the body’s tissues. Red blood cells transport the carbon dioxide from the tissues to the lungs. The lungs throw out this gas when we exhale. The white blood cells are big and few compared to red cells. They are the body’s defenders. Some destroys dead cells. Some produce antibodies. Some others consume and digest bacteria.

   Summary:
   Rough copy: Potatoes
   Potatoes are cooked in many ways. The four main
   methods are boiling, baking, roasting and frying. In
   boiling, we cut the potatoes and cook them with
   boiling water and add salt. We use sauce pan. In
   baking, we put them in an oven. We don’t need to
   peel them. Roasting is like baking. It is also done in
   oven. But we add fat here. Frying is like roasting. But
   it is not done in oven. There are 2 main ways of
   frying. We cut potatoes into slices and fry in frying
   pan. The other way is deep frying. The potato slices
   are put into a pan full of oil and fry. But here we use
   oil instead of water.

   Fair copy: Potatoes
   We can cook potatoes by boiling, baking, roasting and
   frying. In boiling, we cook them with salt added
   boiling water in a sauce pan. In baking, we use oven.
   Roasting is done in oven by adding fat. In frying,
   sliced potatoes are fried in a frying pan or in a pan
   full of oil.

**Summary**

**Rough Copy**

Butterflies are found in gardens. There are about 50,000 different kinds of butterflies. They fly from flower to flower to suck nectar. The feelers help the butterfly to find its way. The tube mouth helps it to suck nectar and the tiny holes on the sides of its body help it to breathe. The four stages of it’s life cycle are egg, larva, pupa and adult. The life span of a butterfly is very short. William Wordsworth wrote a poem on butterfly. He said that he could not tell whether it was sleeping or feeding.

15. a) **Conservation of water**

Water is the basic need of all living beings. It is essential for our life. We must conserve water during all seasons. To conserve water, we should link rivers, avoid domestic wastages. Government insists to harvest rain waters. It helps us to fulfill our water needs during summer. Recycling is also one of the ways to save water. We must grow trees to get more rain. It controls soil erosion and act as sponges.

b) **Insects**

Insects are classified into two main kinds. They are useful and harmful. Useful insects are bees and silk worms. We get honey from bees. Silk worm produces silk. We weave silk sarees with it. The harmful insects are locusts and mosquitoes. Locusts eat growing plants and destroy crops.

Mosquitoes cause malaria. Millions of people die by malaria every year. Few insects are neither harmful nor useful like butterfly and ladybird. They are pretty and colourful.

15. Title: Prevention
Prevention is better than cure. In the same way it is better to prevent something disastrous before it happens. Students should avoid failures by studying their daily lessons properly. They should work regularly to avoid scoring less mark. Every family should save money to avoid getting trapped into debts.

We should take care of our health to avoid diseases. We should not get into any bad habits spoiling our health. By taking preventive measures we can save money rather than spending on medicines.

**Prevention is better than cure.**

**Title: Trees**
Trees are the real wealth of a nation. They should not be cut down. Forests give us a good rain-fall and it is the cause of all natural resources. All students should aim at planting at least few trees. We should encourage people to plant trees.

We should create awareness among people especially in schools and colleges regarding saving trees. We should prevent others cutting down trees.
